# Vietnam hikes rice prices as Indonesia buys more

HO CHI MINH CITY (AP) — Vietnam's government has raised the price of rice to 10,000 VND (\$4.25) a ton, the highest in the country, to encourage farmers to produce more. The move comes as the government seeks to boost rice production to meet the growing demand for the staple food.

The government has also raised the price of rice to 10,000 VND (\$4.25) a ton, the highest in the country, to encourage farmers to produce more. The move comes as the government seeks to boost rice production to meet the growing demand for the staple food.

# PNCC owes gov't P3.7B in concession fees—COA

THE PHILIPPINE NATIONAL CONSTRUCTION CORPORATION (PNCC) owes the government about P3.7 billion in concession fees for the use of its facilities, the COA has found. The audit was part of a broader investigation into the use of state-owned assets.

The COA found that PNCC has been using its facilities for various purposes, including housing and commercial development, without paying the required concession fees.

The audit also revealed that PNCC has been using its facilities for housing and commercial development, without paying the required concession fees.

**Abstract**—The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders between two groups of nurses working in different departments of a hospital. The sample consisted of 100 nurses from the intensive care unit and 100 nurses from the medical-surgical department. Data were collected by means of a questionnaire containing information about sociodemographic variables, work characteristics, and musculoskeletal symptoms. The results showed that the prevalence of musculoskeletal disorders was higher among nurses from the intensive care unit than among nurses from the medical-surgical department. The most prevalent disorder was low back pain, followed by neck pain and shoulder pain. The results suggest that interventions aimed at reducing the prevalence of musculoskeletal disorders should be targeted towards the intensive care unit.

Therapeutic outcomes of the clinical response study will be the identified key health conditions that continue to cause greatest morbidity among African populations, the burden of illness, death, disability, and the disability-adjusted life expectancy, and the impact of these conditions on the population.

## Will SC be 'burial ground' of case on coco levy ownership?

THE SUPREME COURT (SC) may be the final resting place for the long-running case on the ownership of the coconut levy. The case, which has been pending in the SC since 2007, involves the coconut levy board (CLB) and the coconut growers' association (CGA). The CLB claims that it is the sole owner of the levy, while the CGA claims that it is a joint owner. The SC is expected to deliver its verdict in the coming months.

# Big draw for PH eleven

## Late equalizer spoils crack Singaporeans' debut

By Cyril Y. Fong

THEIR DEBUT WAS NOT THE MOST GLORIOUS, BUT THE PHILIPPINE ELEVEN MADE A STRONG STATEMENT IN THEIR FIRST INTERNATIONAL MATCH.

They were defeated 1-0 by the Singaporeans in a friendly match at the National Stadium in Singapore.

The match was played on a hot and humid day, and the Philippine players were visibly tired by the end of the game.

Despite the loss, the Philippine players showed great spirit and determination throughout the match.

The Singaporeans were the favorites, but the Philippine players gave them a hard fight.

The match was a close one, with both teams having chances to score.

The Philippine players were disappointed with the result, but they are confident they can improve.

# Patriots play just one import vs Indonesia five

By James M. Ryan

PHILADELPHIA (AP) — The Philadelphia 76ers' season opener against the Los Angeles Lakers on Tuesday night was a battle of imports, with the Lakers fielding five and the 76ers just one.

The Lakers' imports were Kobe Bryant, Pau Gasol, Ron Artest, Lamar Odom and Dwight Howard. The 76ers' only import was center Joel Embiid.

The Lakers won the game 108-95. Bryant scored 28 points, Gasol 22, Artest 15, Odom 12 and Howard 10. Embiid scored 18 points for the 76ers.

The 76ers will play the Orlando Magic on Wednesday night. The Magic have three imports: Dwight Howard, Shaquille O'Neal and Jameel Collins.

The 76ers' season opener was a disappointment for many fans. They had hoped for a more competitive game against the Lakers.

## PSC: P1.3B needed for grassroots sports plan

By Jeffery M. Mader

MANILA (AP) — The Philippine Sports Commission (PSC) has announced a plan to develop grassroots sports across the country. The plan, which is part of the PSC's five-year strategic plan, calls for a total investment of P1.3 billion.

The PSC will focus on developing sports facilities, training coaches and athletes, and promoting sports in schools and communities. The plan also includes a program to identify and nurture young talent.

# 'Kuliglig' operators bring case to Manila court

**Manila** — Operators of the 'Kuliglig' (Kuliglig) system, a popular form of gambling, have filed a case with the Manila court to challenge the ban on the game. The operators claim that the game is a legitimate form of entertainment and that the ban is unconstitutional. They argue that the game has been played for centuries and is a part of the country's cultural heritage. The court is expected to hear the case in the near future.

# T-bill rates seen to decline farther on increased liquidity

**By Michael S. Sauter** Investors still prefer risk-free debt paper

WASHINGTON, Sept. 1 (AP) — Treasury bill yields are expected to decline further as the government's massive borrowing program continues to flood the market with cash. Analysts say the move reflects a growing preference for risk-free debt paper over stocks and corporate bonds.

The 12-month Treasury bill yield, which has fallen from 3.5% in July to 3.25% in August, is expected to drop to 3% by the end of the year, according to a survey of market participants. The 28-day bill, which has fallen from 3.5% to 3.25%, is expected to drop to 3% by the end of the year.

The move reflects a growing preference for risk-free debt paper over stocks and corporate bonds. The 10-year Treasury note yield, which has fallen from 4.5% in July to 4.25% in August, is expected to drop to 4% by the end of the year.

## Many nonperforming energy contracts face gov't cancellation

**ERDC wants serious investors to take over projects**

WASHINGTON, Sept. 1 (AP) — The U.S. Army Corps of Engineers is considering the cancellation of many nonperforming energy contracts, according to a report. The Corps is looking for serious investors to take over the projects, which are often in the oil and gas sector.

The report says that the Corps is reviewing a list of projects that are not performing as expected. Some of the projects are in the oil and gas sector, while others are in the renewable energy sector. The Corps is looking for investors who are willing to take over the projects and complete them.

### Caribbean oil exports surge 43.4%

WASHINGTON, Sept. 1 (AP) — Caribbean oil exports surged 43.4% in the first seven months of 2009 compared with the same period last year, according to a report. The surge is attributed to a combination of factors, including a decline in U.S. oil production and a decline in U.S. oil imports.

### Gov't to conduct bond swaps on regular basis

WASHINGTON, Sept. 1 (AP) — The U.S. Treasury Department announced that it will conduct bond swaps on a regular basis. The swaps will involve the exchange of Treasury bonds for other types of debt securities, such as corporate bonds or municipal bonds. The goal is to diversify the government's debt portfolio and reduce its borrowing costs.

**Global ties up with N4 group on rewards program**

WASHINGTON, Sept. 1 (AP) — The U.S. Department of Justice is working with a group of four nations to launch a rewards program for information on terrorism. The program is part of a larger effort to strengthen international cooperation in the fight against terrorism.

### Verizon to retire 5 substations to cut systems loss by P3™

WASHINGTON, Sept. 1 (AP) — Verizon is planning to retire five substations in the New York City area, according to a report. The move is part of a larger effort to cut systems loss by P3™. Verizon is also planning to upgrade its network to support 4G LTE service.

## Tell-tale signs of a 'green washer'

By David H. Johnson

**H**ow can you tell if a house is a "green washer"? The answer is: it's not always easy. But there are some tell-tale signs that can help you spot a green washer. One of the most common signs is a house that is overpriced for its location and condition. Another sign is a house that has a lot of "green" features, but no real value. For example, a house with a solar panel system that is not properly installed or a house with a green roof that is not properly maintained. These are all signs of a green washer.

# 'Small' developers key to solving housing woes

By Charles E. Baker

**A** small developer is the key to solving the nation's housing problems, says a leading industry expert. "The big developers are not going to build the kind of housing that is needed," says Robert S. Weiss, president of the National Association of Home Builders (NAHB). "They are too big and too bureaucratic. They are not going to build the kind of housing that is needed for the middle class."

Weiss says that the small developer is the one who is most likely to build the kind of housing that is needed for the middle class. "They are not too big and too bureaucratic," he says. "They are not going to build the kind of housing that is needed for the middle class."

**Builder pushes**

The small developer is the one who is most likely to build the kind of housing that is needed for the middle class. "They are not too big and too bureaucratic," he says. "They are not going to build the kind of housing that is needed for the middle class."

## Way to go, Car!

Car dealers are looking for ways to increase sales and reduce costs. One way is to offer financing options that are more attractive to customers. Another way is to offer services that are more convenient for customers.

## Setting the standard for green resorts

News and photos by Charles E. Baker

The green resort is the new standard for the hospitality industry. "It is not just about being green," says Robert S. Weiss, president of the National Association of Home Builders (NAHB). "It is about being green in a way that is sustainable and profitable."

The green resort is the new standard for the hospitality industry. "It is not just about being green," says Robert S. Weiss, president of the National Association of Home Builders (NAHB). "It is about being green in a way that is sustainable and profitable."

**Green resort plan**

The green resort is the new standard for the hospitality industry. "It is not just about being green," says Robert S. Weiss, president of the National Association of Home Builders (NAHB). "It is about being green in a way that is sustainable and profitable."

## The Lion red

The figure consists of two side-by-side schematic diagrams illustrating the relationship between 'Age' and 'Sex' across different levels of 'Performance'. The left diagram shows 'Age' as a continuous variable ranging from 'Younger' to 'Older'. It depicts three horizontal bars representing performance levels: 'Low Performance' (bottom), 'Medium Performance' (middle), and 'High Performance' (top). Within each bar, there are segments labeled 'Male' and 'Female'. The right diagram shows 'Sex' as a categorical variable with 'Male' and 'Female' groups. Each group contains three horizontal bars representing performance levels: 'Low Performance' (bottom), 'Medium Performance' (middle), and 'High Performance' (top). Within each bar, there are segments labeled 'Younger' and 'Older'. Both diagrams include a vertical axis on the left labeled 'Performance'.

### How I learned to drive

Just like what the green light says—"Go, but with reservation."

Figure 1: A schematic diagram of the experimental setup. It shows a subject seated at a table, viewing a video screen. A camera is positioned above the screen. A horizontal bar is placed between the subject and the screen. The screen displays a target area. The subject is instructed to move the bar to the target area. The diagram is labeled 'Figure 1' and includes a legend for 'Bar' and 'Target'.

Always quality ingredients.  
Always quality goodness.

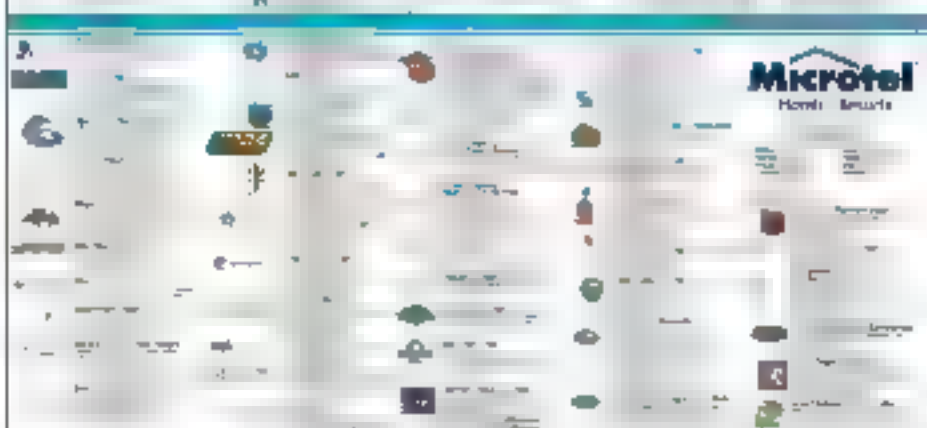

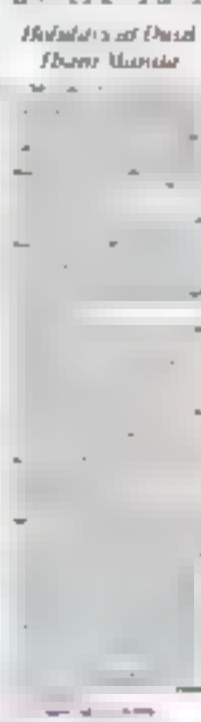

Real Goodness is a real good thing. It's the goodness that's in the ingredients that make up our products. It's the goodness that's in the people who make our products. It's the goodness that's in the way we make our products. It's the goodness that's in the way we serve our customers. It's the goodness that's in the way we care for the world.

# 25 THINGS TO DO IN THE PHILIPPINES ...

... before fantasizing about exploring other countries

**Not all Manila is Shimmer**

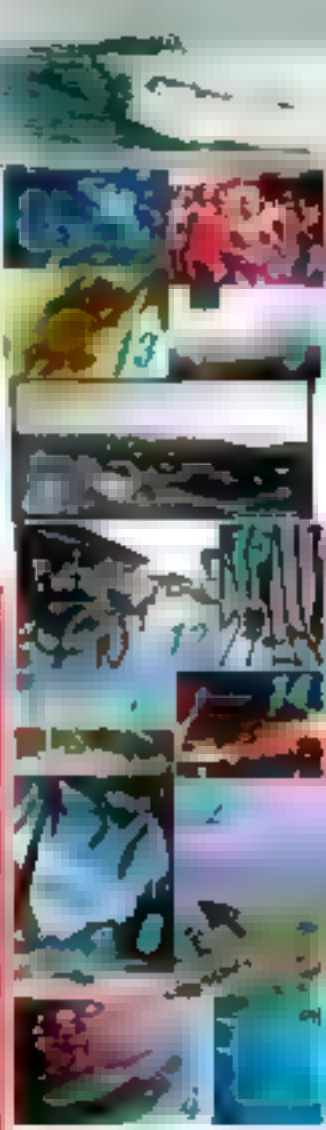

It's not just the city of Manila that's shimmering with life. The Philippines is a country of many faces, and each one is as beautiful as the next. From the bustling metropolis of Manila to the serene beaches of Boracay, there's something for everyone. And if you're looking for a truly unique experience, head to the Philippines' most remote islands, where you can enjoy the peace and quiet of a tropical paradise.

**1. Visit the Philippines' most remote islands.**

For those who want to escape the crowds, the Philippines offers a wealth of remote islands. From the tiny, uninhabited islands of the Sulu Archipelago to the more developed islands of the Visayas, there's something for everyone. And if you're looking for a truly unique experience, head to the Philippines' most remote islands, where you can enjoy the peace and quiet of a tropical paradise.

1. *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is essential for the light-dependent reactions of photosynthesis, where it converts light energy into chemical energy in the form of ATP and NADPH.

# FAB NEW FRAGRANCE SETS FROM SM

Made a name for herself in the fragrance world, SM has now a full line of fragrances for men and women. The brand is known for its unique and bold scents, and its packaging is always a work of art. The new line of fragrances is no exception, with each set featuring a unique and eye-catching design. The sets are available in a variety of sizes, from travel-friendly mini bottles to full-sized bottles. The new line of fragrances is a must-have for anyone who loves a bold and unique scent.

# Points of convergence and divergence at Cinemania fest

By Romeo E. Sora

MANILA, Nov. 1 (PNA) — The 10th Cinemania International Film Festival, which opened last night at the Philippine International Convention Center (PICC), drew a large crowd of moviegoers and film enthusiasts.

The festival, which runs until Nov. 10, features a variety of films from different countries, including the Philippines.

WINNER: Best Philippine Film award.

The festival, which runs until Nov. 10, features a variety of films from different countries, including the Philippines.

## Double Delight

They may have been  
temporarily lower  
in the spring because of  
just the weather and a more  
numerous or otherwise  
pleasant but today Canada  
and Alaska. Tomorrow  
today, night, night.

• **Thyroid**

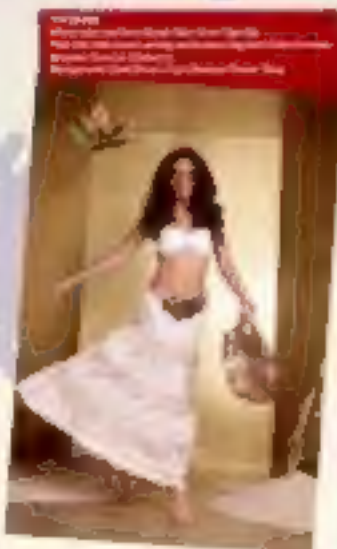

Shaw's (1987) book has 11 chapters and 10 appendices. From Shaw's point of view, the first three chapters deal with the foundations of the discipline, while the last eight chapters deal with the application of the discipline to various fields. The book is written in a clear, concise, and readable style. It is a good reference for students and researchers alike. The book is available in paperback for \$19.95 and in hardcover for \$39.95. It is published by Sage Publications, Inc., 2455 Teller Road, Thousand Oaks, CA 91320. The phone number is (805) 499-9734. The fax number is (805) 499-9735. The website is <http://www.sagepub.com>.

These studies suggest that the use of the *in vitro* model is a valuable tool for studying the effects of various factors on the development of the embryo. The use of this model is particularly useful for studying the effects of drugs and chemicals on the development of the embryo. The use of this model is also useful for studying the effects of various factors on the development of the embryo.

• *Microbes are affected by factors* such as moisture, temperature, oxygen, and pH. Understanding these conditions is the critical factor for food safety and quality. • *Microbes are everywhere* and are present in food, water, air, and soil. • *Microbes can be harmful* to health, but many are beneficial. • *Microbes are used in food* production, such as in the production of cheese, yogurt, and bread. • *Microbes are used in biotechnology* for the production of drugs, vaccines, and other products. • *Microbes are used in environmental* biotechnology for the treatment of waste and pollution.

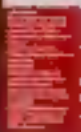

The joys of *holiday*  
dressing

The joy of youth is when one can explore so many styles in looking for his or her individuality. Check out these fun fashion inspirations.
